AGILE IT SERVICES AND NEXT-GEN SOFTWARE SOLUTIONS

Application Development,
Mobility Solutions,
Big Data & Analytics,
IoT & Wearables,
Managed IT Services,
UX, and more

SERVICE OFFERINGS

We help organizations confidently address their business challenges and ensure their technology core is agile and effective. We help them cut through the noise of fleeting technology trends to create enduring results.

Application Development

Agile application development is at the core of Nagarro's DNA, helping our clients build next-gen software solutions and business critical systems.

Big Data & Analytics

Our Analytics solutions help organizations find patterns, predict outcomes, visualize, and process large volumes of data for optimizing operations.

Digital Commerce

Nagarro helps build omni-channel B2B and B2C solutions for retailers across the globe.

User Experience

Our team of UX specialists, designers, and thinkers help drive user delight by crafting user-centric experiences.

Independent Testing & Validation

Driven by our PROVEN testing methodology, our IV&V experts use automation tools as an integral part of the test strategy to ensure high quality software.

Transformation & Modernization

Nagarro offers expertise in strategy, assessment, re-engineering, and integration for transformation of core legacy systems.

Cloud Services and Security

Nagarro's Cloud & Security CoE can help you define and execute a sound cloud strategy, helping you navigate complex compliance and security challenges with ease.

CRM & ERP

Nagarro helps you listen to your customers and suppliers, even when it is not you they are speaking to. Our solutions help improve information flow and operational efficiency across the organization.

IoT & Wearables

Nagarro is helping our clients build the next generation of industrial and automation software for a connected world.

Managed IT Services

We offer consistent and high-quality managed IT services to maintain and support your critical business applications.

Mobility Solutions

The consumerization of technology is driving transformation into a mobile-first world. Nagarro can help you update your mobility strategy, develop your next-gen app, and improve app usability.

Product Engineering

We partner with some of the world's leading software product companies to create cutting-edge consumer and enterprise software.

SUCCESS STORIES

We love to innovate at each touch point of our journey with customers. We do the best in projects with high complexity, technology, or time-to-market challenges. We deliver enterprise-class robust solutions to keep you ahead of the competition.

Flight planning for over a hundred airlines

Nagarro builds the flight planning software for Lufthansa Systems, which is used by 110 airline customers to calculate over 30,000 flights daily. It optimizes take-off and landing performance, the flight route, and the flight level profile - considering all flight restrictions, CO2 emission targets, weather phenomena and historical aircraft data. When your pilot says "Your estimated flight time is 4 hours and 57 minutes", she is likely relying on Nagarro-built software.

Strategic R&D partnership for ASSA ABLOY, the global leader in door-opening systems

Nagarro helps support the digital transformation at this company, which is consistently on the Fortune list of the world's 100 most innovative companies. Nagarro runs ASSA ABLOY's R&D center, developing strategic new products and B2B cooperation tools for this fast-changing industry.

Product engineering services for Blackbaud

As a strategic product engineering partner, Nagarro teams help Blackbaud with product development, professional services, independent validation and verification, and end-to-end IT services. We have recently been awarded by Blackbaud as "The 2016 #WeGiveBack" Winner, which recognizes us as a member of the Blackbaud Partner Network helping good take over the world.

Process analytics to help optimize jet engine manufacturing

Nagarro helps stabilize the complicated manufacturing of composite fan blades for commercial jet engines with a unique process analytics solution that uses advanced statistical models and approaches. Installed at five global sites, this system helps cement the client's industry leadership.

Intranet re-design for a leading manufacturer of premium skin care products

Nagarro offers SharePoint development services to the prestige beauty leader and has developed a personalized corporate intranet designed to realize the vision of a best-in-class, user-focused, and multi-language site. The portal provides support for more than 30 custom content types and offers rich media management including video streaming and social media tools.

Bringing agility to the public sector

Government agencies across the world are modernizing their IT landscape to transform the way services are delivered to the public. Bringing agility and innovation, Nagarro is proud to be a preferred vendor to The City of New York and to a number of other municipalities in the US and Europe.

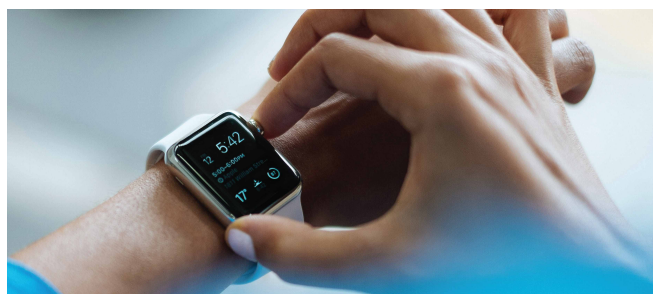

Innovation partner to a leading European bank

Nagarro has delivered 50+ turnkey projects through a secured development center set up dedicatedly for the client. The solutions encompass a wide spectrum including mobile banking, net banking, telebanking, social media analytics, and legacy transformation and modernization.

Calendar application for mobile and wearables

Nagarro offers product co-development services to a leading provider of cloud based conferencing solutions. A calendar application has been developed for both mobile and wearables which helps users to schedule, view, and edit events by synchronizing with multiple calendar services. This application won the best wearable app of 2015 in the "Business Tools" category.

CULTURE AND PHILOSOPHY

Nagarro provides agile IT services and next-generation software solutions to industry leaders across the globe. The work we do is enterprise-class robust, while our agility helps our customers thrive in today's dynamic business world. We call this approach "Enterprise Agile".

We believe being agile is not just about using agile development methodologies in our projects; it is a culture, a culture of being flexible and easy to work with, of intense collaboration between teams that may be several thousand miles apart, and of being fiercely customer-centric. Our core values are **CARING** (Customer-centric, Agile, Responsible, Intelligent, Non-hierarchical, Global) and are a clear reflection of our culture.

Unlike most IT vendors who use commodity engineers to address each project in the same way, Nagarro's intelligent and passionate experts help leading technology firms address complex, multi-disciplinary challenges in innovative, cost-effective, and game-changing ways. Our customers rely on us to keep pace with new expectations, new possibilities, and new competitors because the world is changing faster every day.

At Imagine Labs, Nagarro continuously nurtures cutting-edge technologies and develops innovative apps around the latest technology trends such as Internet of Things (IoT), Machine Learning, Artificial Intelligence, Mobility, Big Data, Augmented and Virtual Reality, and more.

LOOKING AHEAD

Today's fast pace of digital innovation is testing the ability of organizations to evolve rapidly. We at Nagarro help our clients move fast to protect themselves against digital disruptions, and then engineer some disruptions of their own. To achieve this, our own organization needs to be set up for agility. Manas Fuloria, CEO at Nagarro and a PhD in quick response operations management, envisions Nagarro as "a truly 21st century service organization that does not sacrifice responsiveness, creativity, and empathy at the cost of discipline and efficiency". Equipped with this larger goal and corresponding processes and structures, Nagarro is able to provide our clients with the desired digital thrust for accelerated business growth.

PLACES WE CALL HOME

Established in 1996, Nagarro began as a dream of a few friends who wanted to create a company with a difference – a company that focused on “strategic differentiation via technology” initiatives rather than routine IT operations. Even as we grew, we maintained an orientation towards new technologies, complex applications, and decision sciences. Ever since, we have enjoyed working extensively across the globe.

Today we are more than 4500+ experts across 16 countries. Together we form Nagarro, the global services division of Munich-based Allgeier SE.
