Accelerate digital transformation via **Oracle Cloud**

To stay competitive in the rapidly changing market, businesses today need solutions that support agile business processes, fast response times, high availability, on-demand scalability, and simplified infrastructure maintenance.

Nagarro comes with a proven expertise of leveraging Oracle cloud applications to help our clients drive innovation and digital transformation, while increasing business agility, lowering TCO, and reducing IT complexities. Our frameworks, toolkits, and checklists help in optimizing cloud migration that results in data-driven analytics and enhanced user experience.

Delivering Oracle solutions across domains

Manufacturing & Automation

Life-sciences & Healthcare

Telecommunications

BFSI

Retail & CPG

Media & Entertainment

Travel & Logistics

Energy & Utilities

Public Sector

Offering end-to-end services on the Oracle platform

Run the Business
- End-to-end implementation
- Data migration
- System integration
- Custom development
- Managed services

Upgrade the Business
- Upgrade assessment
- Software version upgrade
- Re-engineer and implement
- Legacy modernization
- Global rollouts

Transform the Business
- Thinking breakthroughs workshops
- Business process consulting
- Oracle module assessment
- Roadmap creation
- Analytics and artificial intelligence

Enabling our clients to build a connected ecosystem

Accelerate digital transformation to Oracle Cloud with Nagarro's EDGE methodology

Empathize
- Know the client (goals, fears, initiatives, milestones)
- Leverage templates and checklists to perform cloud transformation assessment
- Present SWOT (strengths, weaknesses, opportunities, threats) and create roadmap

Define
- Leverage our proven toolkit to take a deep dive at current implementation and evaluate processes, customizations, integrations, and data
- Present the findings and create a plan for the journey to Oracle Cloud
- Define KPIs for effective realization of the vision

Govern
- Leverage our diligently drafted best practices for agile project execution with guided system walkthroughs
- Use our built-in framework for streamlining integrations, and 360-degree reporting and analytics
- Define artifacts for user training to ensure effective user adoption

Evaluate
- Map project success on realization of defined KPIs
- Monitor user adoption and conduct further trainings if needed
- Provide cost-effective managed services with continuous service improvement

Thinking beyond projects and investing in relationships

Consolidating & modernizing logistics applications

Nagarro is helping a client in modernizing its entire suite of logistics-related applications. Implementations and integrations have been done across six different ERP, CRM, and supply chain solutions (spread across mainframes) to the latest Cloud applications. Our consultancy services are enabling the customer to achieve an integrated system environment as per global standards.

Global EBS instance upgrade

Nagarro has helped in the successful global upgrade of the existing 12.1 EBS instance to the latest 12.2 on-premise instance with minimum disruption to business. The process included functional setups, validation of migrated data across modules, retrofitting of technical components, system sanity checks, and stabilization support.

Integrations, support and QA across ERP modules

Nagarro is involved in development, integrations and support across supply chain management, financials, and project accounting functional areas. An integrated landscape has helped connect Oracle EBS with EAM, HCM, CRM, and analytics systems. Automation of software quality assurance activities has led to the change management process.

Strategic partner for global rollouts

Nagarro is helping execute global rollouts for the client and bring acquired subsidiaries into a uniform global Oracle platform. Our domain experts are providing support on functional setups, technical development and integrations across business areas mapping to geo-specific requirements.
